

Always assess the quality of the hair before the procedure. Never conduct the Hair Botox treatment on damaged/elastic/poor quality hair. If that is the case, a reconstruction treatment should be performed prior to the Botox.

DIRECTIONS:

No clarifying shampoo or washing is required unless the hair is dirty or has product on it.

1. Spray water on the hair just to get a little bit moist (10-20% only);
2. With the hair slightly moist, split the hair into 4-6 sections;
3. Apply the SK Rose Hair Botox section by section from the root to the end, avoiding direct contact with the scalp (safe margin of 1cm), use a comb to pull the product through the entire length of the strands, cover well;
4. Leave it to act for 30 minutes with a simple plastic cap covering the entire head (no heat during this period), or the necessary time according to the density and porosity of the hair strands and technical analysis of the hairdresser;
5. Afterwards, rinse only the excess product from the hair. Try to leave around 10-20% of the product on the hair;
6. With the aid of a hairdryer, dry the hair completely, without the use of a brush or comb, dry the hair completely;
7. Heat the flat iron at a temperature ranging from 170 °C to 250 °C depending on the quality of the hair, colour, degree of curly, thickness, and density of the strands. The temperatures recommended on the table below are guidelines and require technical analysis from the hairstylist. Check the temperature for any hair shaft lightening after the first's sections made. Flat iron in **thick sections** from 05 to 10 times depending on the amount of straightness desired, whilst confirming that the **strands are sealed**;
8. It isn't necessary to wash the hair after this process. However, as there will be residues of the product in the hair, it may not be as shiny and silky as expected. An excellent time to apply the **Sarah K's Mask** of your choice, letting the mask sit for 3-5 minutes, rinsing after, and applying the **Sarah K's Conditioner** of your choice. Blast Dry the hair after rinsing all the conditioner.

480°F-450°F / 250°C-230°C - Thick, stiff, coarse, or afro hair

410°F-375°F / 210°C-190°C - Healthy dyed, healthy blond, not so thick or curly hair

375°F-340°F / 190°C-170°C - Thin, delicate, bleached, or treated hair

SIZES & EFFICIENCY
1Kg = 10-12 treatments
